

## WHY CHOOSE 2D DESIGNER?

### Benefits and Advantages For Your Company

With 2D DESIGNER, you'll be able to maximize design efficiency on piping projects of all sizes and ranges of complexity. By combining proven technologies with AutoCAD's advanced graphics engine, PROCAD has created a piping design software suite that will help ensure all your projects are completed on time, on budget and to the exacting standards of your organization.

Each 2D DESIGNER application is rich in features and functionality that enhance all aspects of process piping design. With extensive customization available, 2D DESIGNER enables you to conform to each customer or project's drafting and design standards. What's more, our dedication to ongoing research and development means our software will continually improve to meet your expectations, as well as those of your clients.

Here are some of the features which make 2D DESIGNER a great tool for enhancing all aspects of productivity:

- Cost effective solution. With 2D DESIGNER, exponentially increases productivity. The software's ROI (Return On Investment) is very quick and can be achieved in as little time as 3 months.
- Training tailored to each customer available over the web or at customer site. We offer timetables for training to suit your company's schedules.
- Excellent service and support. PROCAD prides itself on its customer support. It is our mission to ensure your company is getting maximum benefits from the software's comprehensive and robust functionality.
- Ease of use—A clear, user-friendly interface includes on-line help and informative on-screen messages.
- Easy installation and flexible licensing—Install 2D DESIGNER on a network or individual workstations and only pay for the licensing options you require. Our technicians will make sure you have all the support you need to get up and running with confidence.

- Standards management tools—Organize customer or project settings by assigning each project or customer its own design standards. You can even specify a variety of settings used for the customer or for the project, such as Metric or English units, layering requirements, border drawings, selected piping specs, scaling factors dimensioning variables and more. With these settings in place, drawings created for each customer or project are consistent from start to finish.
- Metric and English units support—2D DESIGNER allows you to use metric, English or a combination of both.
- Spec driven piping design—Create your own specs with a source database that includes an extensive array of fittings in a wide variety of ratings and materials.
- Material management capability—The Bill of Material Generator enables you to manage each project's material effectively including the ability to generate customized material reports.
- Extensive component coverage—Utilize a complete library of symbols and components.
- Innovative menu system—Find the tools and commands you need quickly with a menu system designed to provide instant access.
- Comprehensive CAD functionality—Timesaving features make drafting less cumbersome and highly productive. For example, 2D DESIGNER allows you to automatically extract a component's dimension and material data, draw the symbol and incorporate all the information into a single group.
- Attention to drawing aesthetics—With special attention paid to the aesthetics of each symbol and component, 2D DESIGNER ensures your drawings accurately reflect your company's high standards and scrupulous attention to detail.
- Multiple AutoCAD version support—2D DESIGNER works with multiple versions of AutoCAD to minimize the need to upgrade frequently.
- Free updates—PROCAD's latest fixes and features are available on our website at no additional cost to customers. Our products support the latest Windows operating systems and AutoCAD software so you can always use the most up-to-date technology available.
- Maintenance program—Get priority technical support, professional installation and setup consultations as well as software upgrades at no extra cost when you choose this annually renewable plan.
- Proven software for over fifteen years—Rely on our solid reputation as a provider of excellent products, extensive services and prompt technical support.
